Demo Hub Preparations

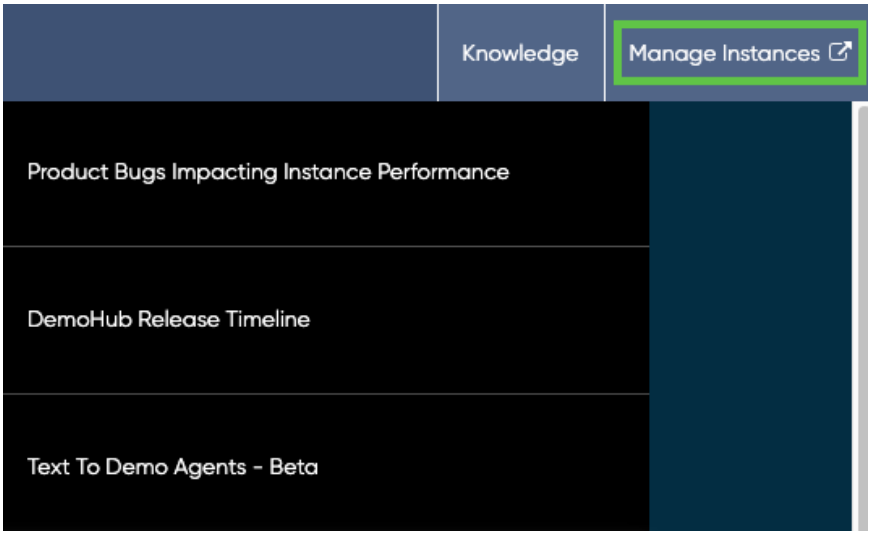
Obtain Demo Hub Instance

Obtain a **Zurich (Alectri)**

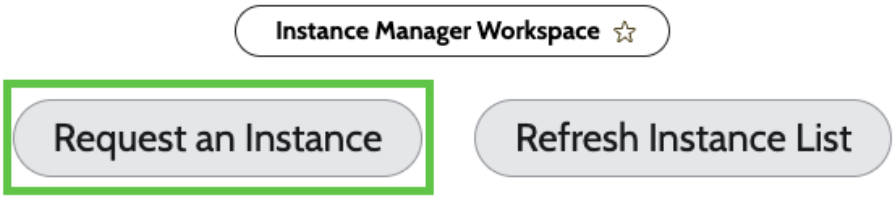
Alectri (Zurich) | Zurich (Ready-Made) | Zurich

instance in Demo Hub as your instance for the workshop in your data center of choice. **Note:** the workshop labs will only work on a **Zurich (Alectri)** image; selecting any other category will lead to steps not working correctly.

1. Log-in to https://demohub.service-now.com/ (https://demohub.service-now.com/) with your ServiceNow account.
2. Go to Manage Instances in the top right corner of the page. This will open a new window.



3. In the next screen, click **Request an Instance**.

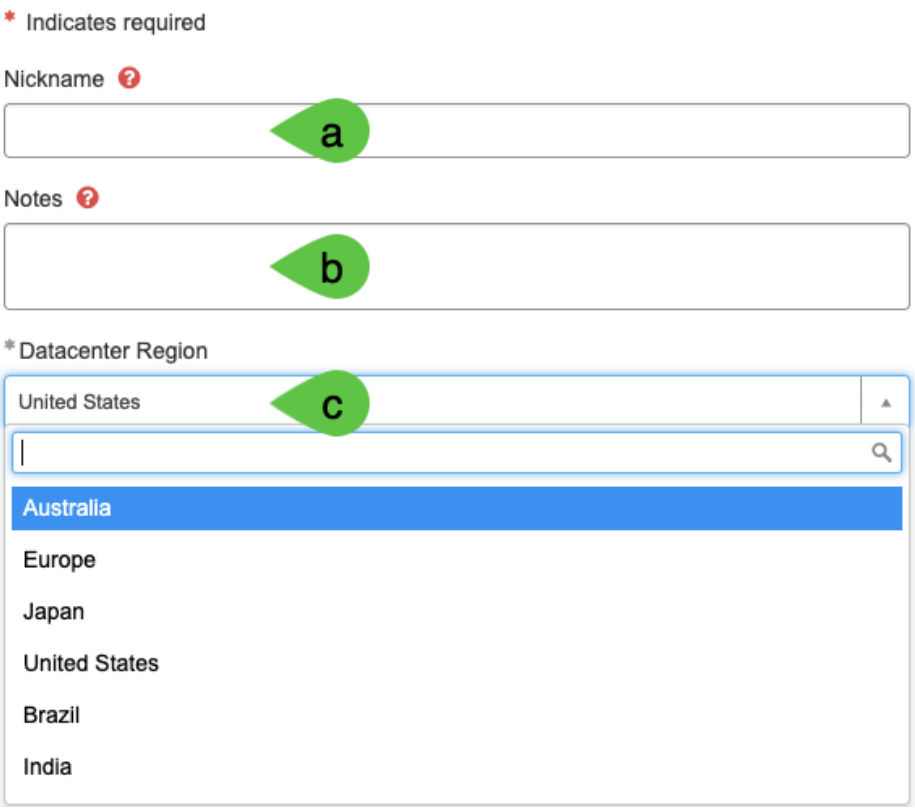


4. Fill in the following details:

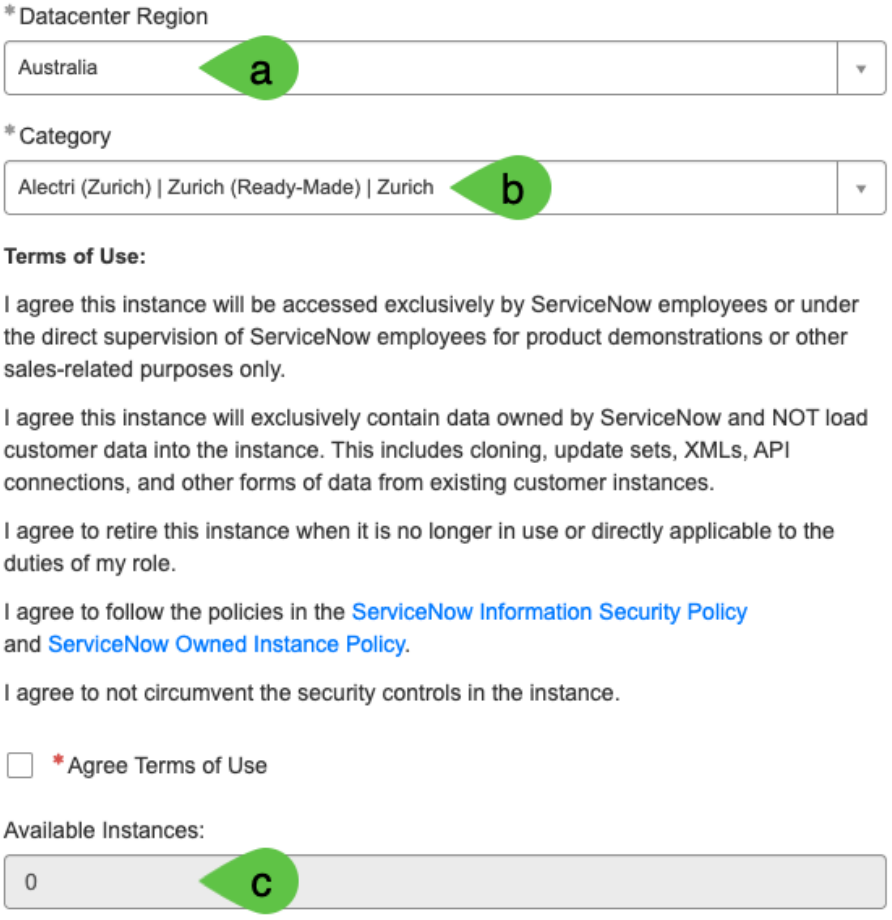
   a.) Nickname: optional

   b.) Notes: optional

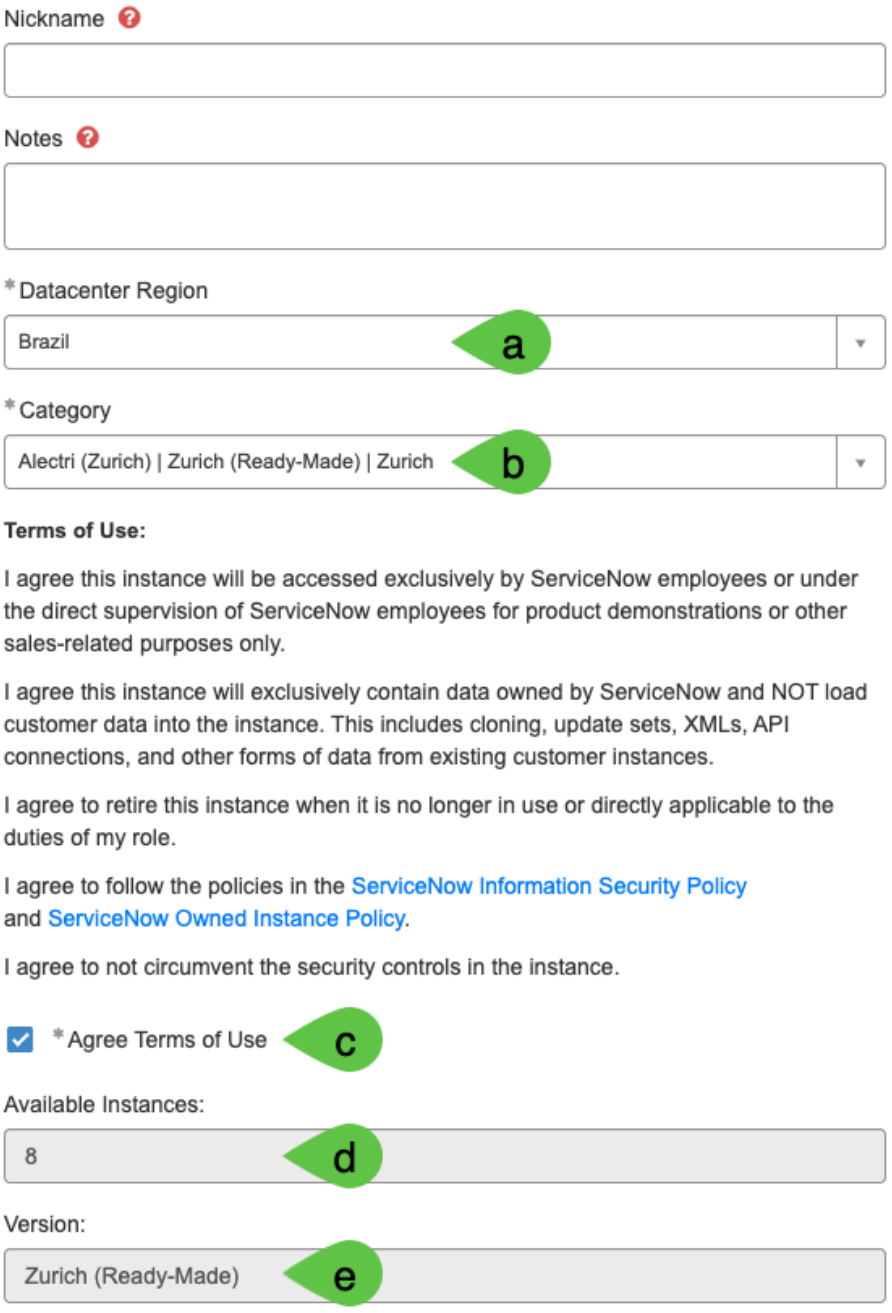
   c.) Data Center Region: select your preferred region. Note that you may need to cycle across different regions if your preferred region does not have an available instance. More on this on next step.



5. See below for a negative scenario where upon selecting **a.)** Australia for **b.)** Alectri (Zurich), the available instances is **c.)** 0.



6. Selecting **a.) Brazil Data Center Region** then **b.) Alectri (Zurich) Category** in this example, shows that there are 8 instances available. You may have a different experience on instance availability by the time you provision. **c.) Agree to Terms of Use**. Notice there are **d.) 8** available instances with a **e.)** confirmation of the version you are selecting.



7. Click on the **Submit** button at the top-right corner of the navigation.

8. In less than 10 minutes, you will receive an email indicating that your instance has been provisioned with the instance ID and login details.

DemoHub

The DemoHub Alectri (Zurich) instance you requested is now ready!

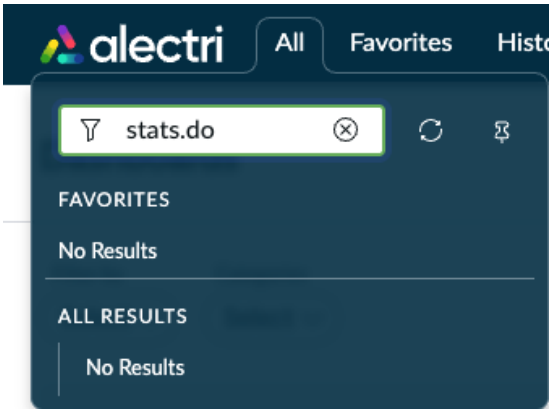
Datacenter Region: Brazil

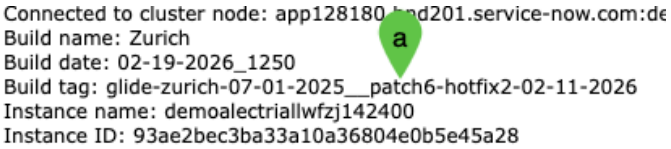
Important Preparation: Install Lab Dependencies

This contains critical steps to prepare your Demo Hub Instance.

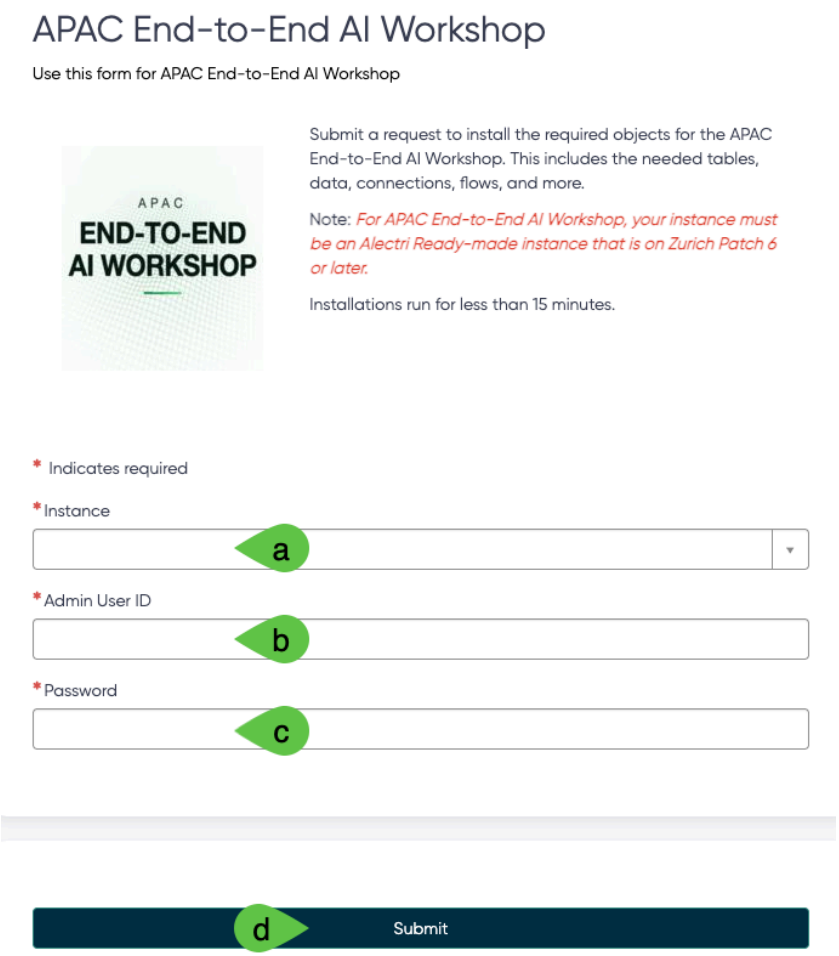
1. Ensure you are at least in Zurich Patch 6. Go to **All** > type **stats.do** and hit Return/Enter ↵. Ensure that it is empty.

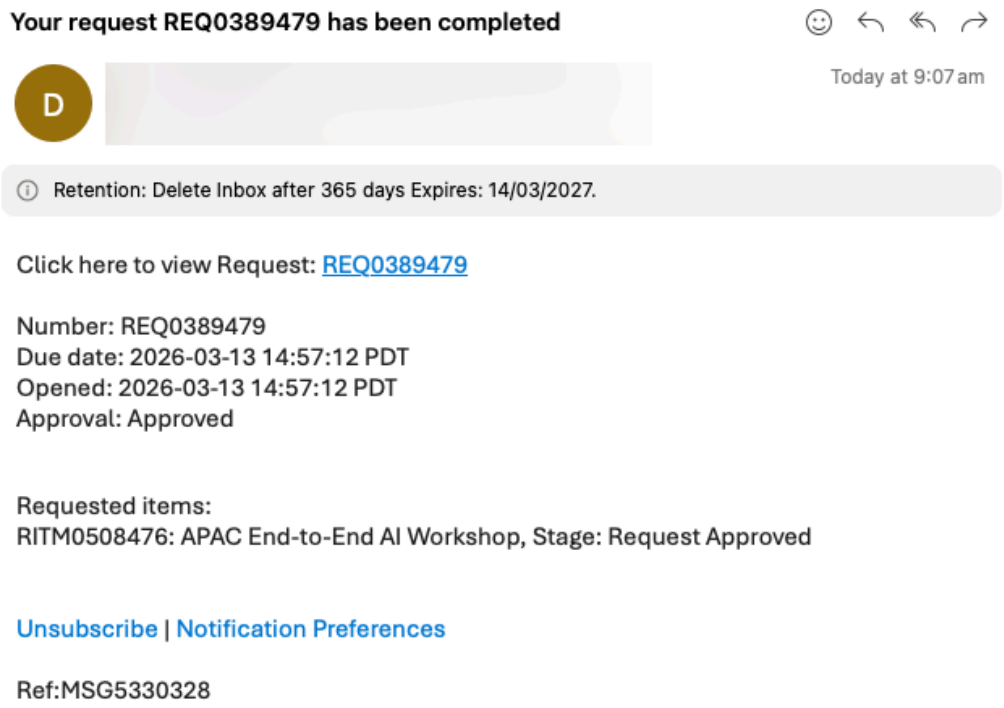


2. You should get a build tag with Zurich and the needed patch name.



3. If you have not done so yet, log in to Demo Hub (https://demohub.service-now.com/) then go to the APAC End-to-End AI Workshop (https://demohub.service-now.com/edsp?id=sc_cat_item\&sys_id=8bb12066fb2f761042e1f57675efdc85\&sysparm_category=f2d15f6893429250e0d5b3aa6aba105a)catalog item to install the lab dependencies in your instance.
4. Provide your **a.)** Zurich Patch 6 or newer **Instance** name, **b.)Admin User ID**, and **c.) Password**, then **d.)** click **Submit**.





5. Wait for 10 to 15 minutes.
6. Once completed, you will get an email indicating that the import of update sets is successful.
