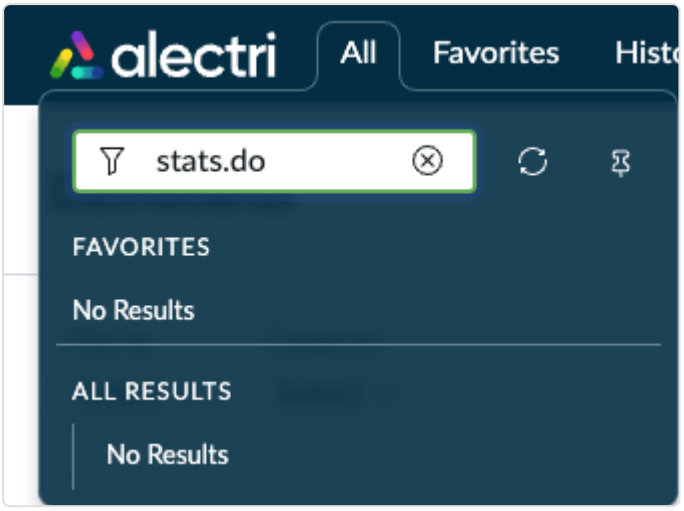
Important Preparation Install Lab Dependencies

This contains critical steps to prepare your Demo Hub Instance.

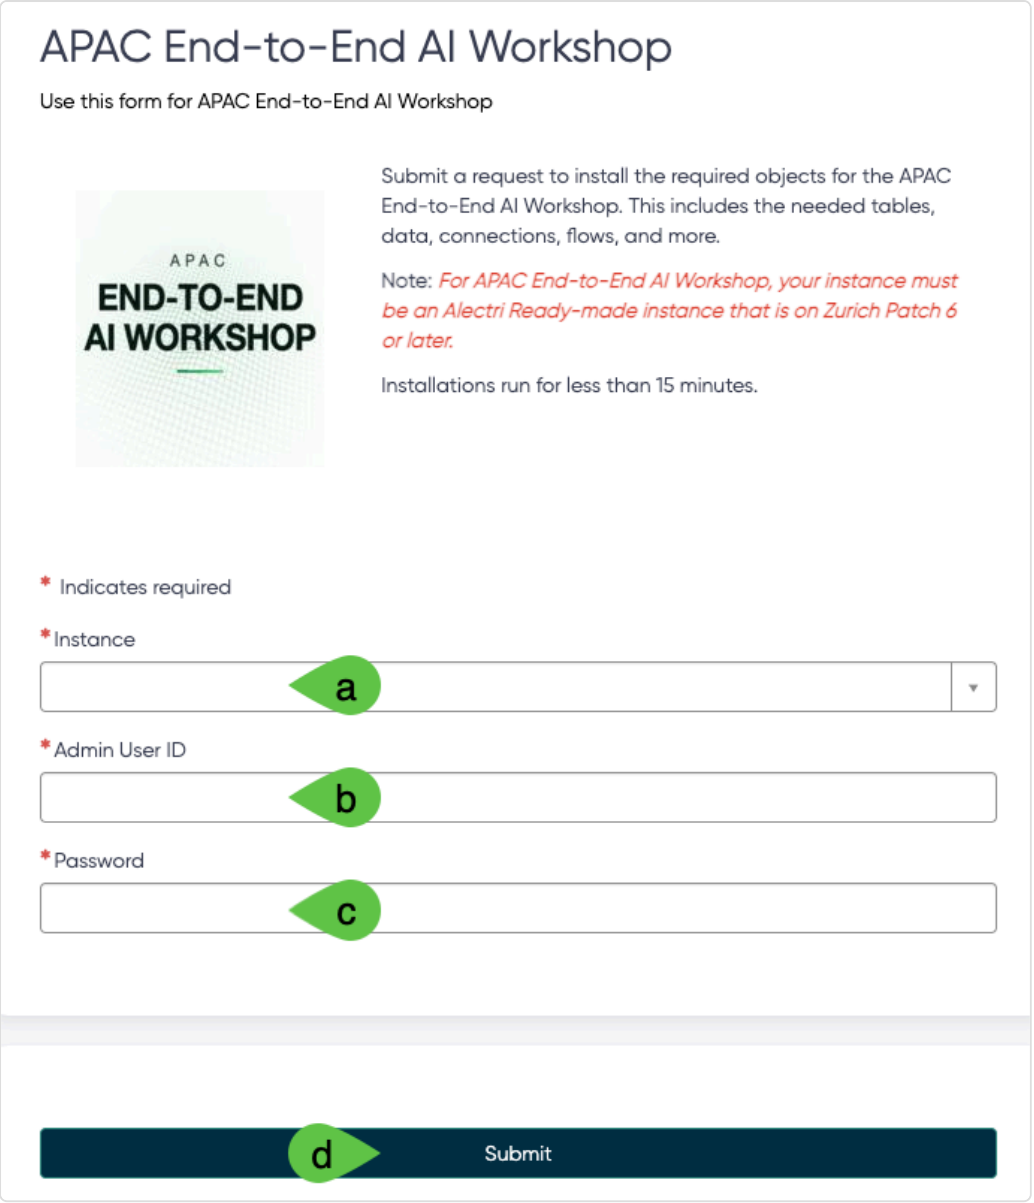
1. Ensure you are at least in Zurich Patch 6. Go to **All** > type **stats.do** and hit Return/Enter ↵. Ensure that it is empty.



2. You should get a build tag with Zurich and the needed patch name.

3. If you have not done so yet, log in to Demo Hub then go to the APAC End-to-End AI Workshop catalog item to install the lab dependencies in your instance.

4. Provide your a) Zurich Patch 6 or newer **Instance** name, b) **Admin User ID**, and c) **Password**, then d) click **Submit**.



5. Wait for 10 to 15 minutes.

6. Once completed, you will get an email indicating that the import of update sets is successful.
